

RAIN EVENT SITUATION

Stanmore Coal Limited (**Stanmore**, the **Company**) notes the recent media coverage of Tropical Cyclone Debbie (**TC Debbie**), a large cyclone that is traversing parts of north Queensland. TC Debbie has delivered significant wind and rain conditions and is expected to continue for a number of days, impacting large areas of the Bowen Basin.

The Company's Isaac Plains Coal Mine (**Mine**) was placed into a protective phase well prior to the rain event, with all mining operations ceased and key assets secured away from mining areas and potential water courses. The Mine's port provider has issued a force majeure notice as part of their preparations to protect key assets and infrastructure. At this stage the Company anticipates production will be impacted for the rest of the week, assuming no material damage is sustained to key Mine assets or those assets of the Mine's critical suppliers, including rail, port, water and power. The Mine's stock position will assist in mitigating potential impacts from delays.

The Company will provide further information on the status of the Mine when the potential impact of TC Debbie and its course over Queensland is better understood. The safety of our people and those associated with our Mine remain our highest priority and operations will only recommence when conditions permit.

ABOUT STANMORE COAL LIMITED (ASX CODE: SMR)

Stanmore Coal is an operating coal mining company with a number of additional prospective coal projects and mining assets within Queensland's Bowen and Surat Basins. Stanmore Coal owns 100% of the Isaac Plains Coal Mine and the adjoining Isaac Plains East Project and is focused on the creation of shareholder value via the efficient operation of Isaac Plains and identification of further local development opportunities. Stanmore continues to progress its prospective high quality thermal coal assets in the Northern Surat Basin which will prove to be valuable as the demand for high quality, low impurity thermal coal grows at a global level. Stanmore's focus is on the prime coal bearing regions of the east coast of Australia.
